

AIR 19HN

WATER-BASED STRONG DETERGENT

AIR 19HN is a strong detergent, water-based, non flammable for generic use, safe on all surfaces, varnished and not, in mechanic, air-force and food-industry plants, etc.

In normal use conditions AIR 19HN is a limited-foam detergent.

It removes dirt, dust, grease and grease film, light carbonaceous residuals and residuals of tar-paulins dumping and vehicle chassis dumping, as well as residuals from machineries that moves on the ground, etc.

It can be safely used on well set paints.

It can quickly be rinsed and it does not leave stripes, stains or deposits on surfaces.

It is used mixed with water, minimizing waste management and dumping problems.

It does not corrode Plexiglas.

It is safe on all metals, including aluminum and stainless steel.

DIRECTIONS:

The concentration for product use will depend on the actual amount of dirt to be removed, however the product already works effectively at a concentration **of 2%**.

For light cleaning (vehicle interiors, floors, etc.) it can also be used at a concentration of **1%** in water.

For very dirty parts, difficult to be cleaned, use until a concentration of 10 to 20% in water.

Apply the solution with a sprayer on the part to be cleaned, wait 5 to 10 minutes, brush if necessary, then rinse with pressured water.

PRECAUTIONS

Refer to the safety data sheet.
