

AIR YELLOW

CONCENTRATED LIQUID DETERGENT

AIR YELLOW is a liquid alkaline detergent with controlled foam formation; it is safe on all well-set painted and non painted surfaces as well as metals, many plastics like melamine, skai, Plexiglas, etc.

AIR YELLOW is easy to rinse and doesn't leave residue or stripes deriving from water hardness

APPLICATION AREAS

AIR YELLOW is to be used to remove, dirt, dust, protective oily films greases, light carbon residues, smog from transportation vehicles, working machine exterior structures, general containers, aluminum panels etc.

USE INSTRUCTIONS

AIR YELLOW has to be diluted with water and its concentration strongly depends from the amount of dirt, its condition, the removal process and the working temperature

For light cleaning like interior of transportation vehicles, or equipment carters, it should be used between 0,5 – 2 %.

For in-depth cleaning the concentration can raise up to 10 - 20%.

It can be applied by rags or trough a sprayer on the surface to be cleaned.

After application wait 5 – 10 depending from the dirt; if necessary brush with appropriate tools the surface. Rinse throughoutly, preferably with pressurized water.

If applied with vapor cleaner, the dilution should be 0,5 – 1%.

Rinse throughoutly

STORAGE

The product has to be stored properly, between between +5°C and +35°C, away from incompatible substances, in cool and ventilated facilities.

SHEL LIFE

The product, properly stored and in unopened containers has a shel life of 24 months

PRECAUTIONS
