

**Product's description** **Rust converter, non protective, pickling solution.**

**Atriaconverter** is an efficacious, temporary rust converter, having a strong degreasing action. It is composed by an inorganic, mineral acid solution, in a stable blend, having a low corrosive action.

The product is not effective over black sheet iron (non mature calamine); it is 10% effective over red sheet iron (mature oxidation).

**Practical advice**

Suitable for oxidized iron, white iron (cold-drawn sheet iron), hot galvanized iron (old and new), stainless steel to be painted.

**Technical features**

Aspect	Liquid
Color	Transparent greenish
Density Kg/Lt	1
PH	2 – 4
Theoretical spreading rate Sq.m/lit – gr/m <sup>2</sup>	According to oxidation
Typical thickness humid/dry micron	Not applicable
Mixing ratio Base/Hardener	Not applicable
Pot Life	Not applicable
Thinner	Fresh water

Painting method	Brush	Unthinned
	Roller	Not suitable
	Spray	Applicable to a limited degree

Application of the product

Oxidised sheet iron (red-coloured): remove by brushing dusty oxidation. Apply **Atriaconverter** unthinned, let react for 15 – 30 minutes, until the oxide reducing reaction is complete (the color from oxide red becomes dark grey). Wash and brush.

White sheet iron: (cold-rolled or hot galvanized): apply **Atriaconverter** 1:2 – 1:3 thinned with drinking water, rinse out and check if the water film is continuous, otherwise repeat the operation.

Stainless steel: apply **Atriaconverter** 1:4 – 1:5 water thinned, rinse out to make the steel surface matt and to have therefore the greatest adhesion on the substrate.

Flash point	Uninflammable
Shelf life	36 months
Standard package	L. 1, L. 5, L. 20

# Atriaconverter

## Notes

After **Atriaconverter** treatment, wash carefully the substrate, so that the painting cycle adherence won't be compromised. Protect face, eyes and skin. During application, protect marble, aluminium and wood surfaces.
