

MADE IN PAINT

# Atriathermika Igienizzante

Scheda Tecnica Revisione : del :

**Type of product** Sanitizing sanitizing anti-mold solution.

Atriathermika Igienizzante is a concentrated solution based on quaternary chemical compounds nitrogenated and free of phenyl-mercuric compounds. Its specific composition effectively heals external and internal wall surfaces contaminated by mold, algae, lichens. Biodegradable, easy to apply, non-polluting type in compliance with recent EEC regulations concerning the classification of chemical substances.

**Fields of Application** For surfaces of any nature, new or already painted, external and internal of hospitals, schools, barracks, dairies, pasta factories, breweries and public places where an energetic action is required anti-mold and anti-algae.

**Technical Characteristics**

Appearance	Clear liquid
Colour	Straw yellow
Density	1 ± 0,05
Supply viscosity 25 ° c	12 – 15 sec. Ford 4
Volumetric dry residue%	12 % ± 2
Theoretical Spreading Rate	12 – 16 sq.m/lt according to the degree of absorption
Dilution	Water potable

	Brush	As it is
APPLICATION METHOD	Ruller	As it is

Minimum coverage and reaction time 3 - 4 hours

Storage stability 12 months  
Standard packs Lt 0,750 – Lt 5

## Rules of Application Surface preparation

### Restorative for internal and external moldy walls

Apply Atriathermika Sanitizer with a brush or sprayer on the infested areas or with presence of mold, leave to react for 3 - 4 hours, then brush and clean well surface.

If the mold has also formed in the plaster and in depth, reapply a second coat with the same methods as above.

To paint the surfaces, proceed with the Atriathermika cycle.

**Recommended for** Masonry surfaces and concrete surfaces in general.

**Not Recommended for** Wooden surfaces and various agglomerations.

**Recommended finished** Internal and external water-based paints and coatings
