

DRACOSEAL

OSMOTIC, ONE-COMPONENT CEMENTITIOUS BREATHABLE COATING FOR WATERPROOFING CONCRETE AND MASONRY SURFACES

DRACOSEAL is an osmotic, one-component cementitious mortar, ideal for waterproofing cellars, tanks, pipelines, lift shafts, basins and walls. Thanks to its osmotic properties, **DRACOSEAL** penetrates the outer layer of the substrate and creates a coating which is resistant to both positive and negative thrust, thus providing maximum adhesion to the substrate and durability of the intervention. The product is non-toxic as per Min. Decree dated 21.03.73, Min. Decree 174:2004 and may thus be used in contact with drinking water (Certificate of suitability EUROFINS n. AR-13-ID-018069-01).

BENEFITS

DRACOSEAL is an osmotic cementitious coating for rigid waterproofing concrete and masonry surfaces. The benefits of using **DRACOSEAL** are:

- ✓ **WATERPROOF EVEN UNDER COUNTERTHRUST:** **DRACOSEAL** waterproofs and withstands even negative hydraulic pressures;
- ✓ **RESISTANT TO THE ENVIRONMENTAL CHEMICAL ACTIONS:** **DRACOSEAL** has a good resistance to the aggressive environments
- ✓ **RESISTANT TO ABRASION:** **DRACOSEAL** has a very high surface resistance;
- ✓ **EASY LAYING:** **DRACOSEAL** is quick and easy to apply by brush or spray thanks to its fluid consistency.

AREAS OF APPLICATION

DRACOSEAL is an easy-to-apply waterproof coating; it is used to fill and seal empty spaces and porosities with an osmotic effect. It is ideal for:

- ✓ Waterproofing of cellars, retaining walls, lift shafts, tanks, pools and internal/external walls at large even in retaining structures.
- ✓ Waterproofing of pipelines, irrigation channels and water tanks, for drinking water as well.
- ✓ Waterproof coating of pipelines for wastewater and sewage;
- ✓ Waterproof coating of walls made up of cement blocks, concrete, gas beton.
- ✓ Waterproof coating of structures subject to sandblasting, such as columns, profiles, bulwarks.
- ✓ New jersey barriers exposed to car traffic of roads and highways.

HOW TO USE

SUBSTRATE CLEANING

- ▶ remove all loose and crumbling concrete parts from the area concerned with the restoration work, including grout laitance, through mechanical chiselling or power washing, by taking care not to damage the structures.
- ▶ remove stains, efflorescences, residues of oil, grease, varnish, lime, dust, dirt, etc.;
- ▶ remove any previous restoration work if irreparably damaged or deteriorated;

SUBSTRATE PREPARATION

- ▶ Brush or sandblast (on large surfaces) the areas to be repaired, by removing any trace of dust. First repair all the empty spaces, holes, cracks found with the FLUECO line mortars.
- ▶ water infiltration on the substrate: The presence of water seepage and infiltration on the substrate may provoke the washing of mortar prior to complete hardening. Thus it will be necessary to prevent any contact with water before the application of DRACOSEAL, by using the quick-setting mortar HYDROPLUG, or even by deviating water with appropriate drainage.
- ▶ saturate the surface with pressurized water and wait for evaporation. The free water on the surface must be removed with compressed air or with a cloth.

MIX PREPARATION

Pour into a suitable container 5.5-6 litres of water and gradually add DRACOSEAL by observing the specified mixing ratio. Slowly mix for at least 4 ÷ 5 minutes till getting a well-blended and lump-free mix. Let the mix stand for about 5 minutes, then mix again for a few minutes before proceeding with the product application. Check that all of the product has been correctly mixed and that no residues of dust have remained along the walls and on the bottom of the container.

LAYING

The areas to be treated must be dampened with water before treatment. DRACOSEAL is formulated to be applied by brush or spray. Application by brush: load the brush with product and apply a thick coat, then proceed with levelling q.s. Wait at least 5-6 hours (depending on the absorbency of the substrate and on the environmental conditions) between the first and second coat, by carefully avoiding to apply the next coat if the previous one is not totally dry. The brushstrokes shall have just a horizontal direction, to obtain a nice-looking finish. Pay particular attention while treating corners and fillet joints. Application by spray: dampen the substrate to saturation and apply DRACOSEAL in two layers, by using a regular plastering machine.

PACKAGING AND STORAGE

DRACOSEAL is packaged in:

25 kg bag

If the product is stored properly in its original packaging, indoors in a dry and frost-free location, it maintains its original features for one year.

AVAILABLE COLORS

DRACOSEAL is available in white and cement grey

WARNINGS

- ▶ Do not use on surfaces of gypsum, plasterboard, plastic plasters, varnished walls, chipboard and wood composition panels, asbestos-cement.
- ▶ Do not use on flexible surfaces.
- ▶ Do not apply onto walkable surfaces exposed to heavy traffic.
- ▶ DRACOSEAL tolerates slight humidity. Do not apply in the presence of high humidity or on stagnating water.

PRODUCT FEATURES

APPEARANCE	Powder
COLOUR	Grey - White
APPARENT MASS VOLUME	approx. 1,3 kg/l
PACKAGES	sacco da 25 kg
CONSERVAZIONE	12 month

APPLICATION DATA

COLOUR OF MIX	Grey or white
MIXING WATER	5.5-6 litres of water per 25 kg bag
DENSITY OF MIX – UNI EN 1015-6	2000 kg/m ³
CONSISTENCY - UNI EN 1015-3	225 mm
APPLICATION TEMPERATURE RANGE	+5 ÷ +35°C
OPERATING TEMPERATURE RANGE	from - 20°C to +80°C
POT LIFE OF MIX	approx. 1 h
HARDENING TIME - UNI EN ISO 13294	Start: 360 min. (6 h) ; End: 480 min. (8 h)
APPLICATION OF THE NEXT COAT AT 20°C RH 65%	About 6 hours depending on the substrate (max 24 hours)
COMMISSIONING (20°C R.H. 65%)	at least approx. 7 days
MINIMUM APPLICATION THICKNESS	2 mm
CONSUMPTION	approx. 1.6 kg/m ² per mm of thickness 3 kg/m ² recommended minimum (with light humidity) approx. 2 mm 5 kg/m ² with hydraulic pressure (1 atm) approx. 3 mm

PERFORMANCE CHARACTERISTICS AS PER EN 1504-2

COATING (C) ACCORDING TO MC AND IR PRINCIPLES 20°C - 50% R.H. – THICKNESS 2 mm

PERFORMANCE CHARACTERISTICS	TEST METHOD	REQUIREMENTS	PRODUCT PERFORMANCE
BOND STRENGTH ON CONCRETE (substrate type MC 0.40w/c ratio = 0.40) according to EN 1766	EN 1542	for rigid systems without traffic: ≥ 1.0 with traffic: ≥ 2.0	2,3 MPa
COMPRESSIVE STRENGTH	EN 12190	not required	42 MPa at 28 days
PERMEABILITY TO CARBON DIOXIDE	UNI EN 1062-6	$S_D > 50 \text{ m}$	1120m
PERMEABILITY TO WATER VAPOUR - equivalent air thickness S_D	EN ISO 7783-1	Class I $S_D < 5 \text{ m}$ Class II $5 \text{ m} \leq S_D \leq 50 \text{ m}$ Class III $S_D > 50 \text{ m}$	$S_D < 0,9 \text{ m class I}$ (permeable to water vapour)
CAPILLARY ABSORPTION	EN 13057	$W < 0,1 \text{ kg/m}^2 \times h^{0,5}$	0,048 kg/m² x h^{0,5}
REACTION TO FIRE (EUROCLASS)	EN 13501-1	class declared by the manufacturer	A1
OTHER FEATURES			
RESISTANCE TO POSITIVE HYDRAULIC THRUST	UNI EN 12390/8	5 Bar (50 metres water column)	
RESISTANCE TO NEGATIVE HYDRAULIC THRUST	UNI 8298/8	1 Bar (10 metres water column)	
RESISTANCE TO FROST AND THAW AS PER THE ASTM C 666 TEST	ASTM C 666	no alteration after 50 cycles at -26° C	
STANDARD RESISTANCE TO MOULD GROWTH	TT-P 296	no trace of mould growth after 21 days of incubation	
RESISTANCE TO SALT SPRAY		no deterioration after immersion in a solution at 32° C for 300 hours	

ITEM SPECIFICATIONS

In order to waterproof all the parts even subject to negative water pressure, apply DRACOSEAL in two successive coats in full compliance with the instructions and recommendations of the manufacturer, **Draco Italiana S.p.A.**, which may upon request provide technical support with its skilled personnel.

Legal notice - SLCMP version dated 01.03.2017

In the technical specifications herein, Draco Italiana s.p.a. used the indicators therein specified, with the relevant standards.

Please check if this Sheet and the figures therein contained apply to the product batch you are interested in or if they have been overridden by any later release. If in doubt, check whether this Sheet matches the one applicable at the time of finalising the sales agreement, at www.draco-edilizia.it, and/or contact our Engineering Department.

No advice provided by our staff, either verbally or in writing at your request, about the potential applications of the Products shall be binding under the sales agreement or shall be considered an integral part of the agreement. Such advice is based on our experience and on the best available practical and/or scientific knowledge; as such, it shall not be binding or conditional on the buyer or user. Please try our products first to find out whether they are fit for your intended use or application; in any case, you shall be solely responsible for your choice.
