

FS EXTERNO 50D

CLEANER ACID WASHING EXTERIOR-CASH (RAIL TRANSPORT)

EXTERNO FS 50D is an acid product in liquid form, specifically formulated for the removal of dirt typical of rail vehicles such as rust, oxides, residues of braking strains and all components deriving from atmospheric and environmental agents (smog, limestone residues ..)

FS EXTERNO 50D, on the recommended concentrations for use, is compatible with the environment and with all the sewage systems.

USES

It is used for washing the outside case of railway transport, underground railways and intermodal transport, both with manual systems automatic or semi-automatic.

INSTRUCTIONS FOR USE

Manual system	from pure to diluted from 30 to 50%
Automatic and semi-automatic systems	Diluted 5-10%

In case of manual operation (extraordinary maintenance) use it with brushes and insist on rusty parts.

For the use with automatic /semiautomatic installations (ordinary maintenance) prepare the dosing system to have a use solution to the optimum concentration.

PRECAUTIONS

Before use refer to the material safety data sheet.
