### GAVIOTA 4038

STRIPPER CLEANER CONCENTRATE FOR DOG TEETH

GAVIOTA 4038 is a pickling cleaner concentrate for barnacles. It has inhibited action, controlled, safe and uniform, which loosens scale and corrosion without damaging the base metal.

GAVIOTA 4038 removes limescale and rust. It is far less corrosive than any similar product. It is safe in use of steel, bronze, brass and fiberglass. It must be stored in containers of rubber or of plastic materials resistant to acids.

### INSTRUCTIONS FOR USE

GAVIOTA 4038 is used in solution from 10% to 50% by brush or spray on the surface that need it, depending on the treatment and the extent of the inlay to remove. Increase concentration in the event of exceptionally heavy contamination and tenacious.

GAVIOTA 4038 is added to the water slowly, cautiously. This product is normally used at room temperature, but its action can be accelerated by bringing it to a maximum of 70 ° C if it is ensured adequate ventilation and bearing in mind that, at high temperatures, decrease the duration of the solution.

### PACKAGE

Bottle with dispenser 1 Lt
