

HAC LIQUID CHLORINATED CAUSTIC DETERGENT FOR THE FOOD INDUSTRY

HAC LIQUID is a caustic detergent that contains active chlorine, specifically formulated for energy, circulation or spray cleaning of containers, circuits, machinery, floors, etc.

It rapidly removes hard dirt deposit, grease, dust, blood, organic stains, etc., leaving the treated surface clean and with no deposits.

HAC LIQUID is particularly effective for circulation or spray cleaning of tanks, sprayers, floors, tiles and other tools or machinery in the food industry.

It contains water softeners that improve its usage in areas where water hardness constitutes a problem in cleaning operations. It contains active chlorine that increases its ability to remove organic dirt, by giving it a strong sanitizing action.

Aspect	Light yellow liquid, chlorinated odor
Flammability	NON flammable
Chlorine content	1% solution: 170 ppm of Cl ₂

DIRECTIONS

1. Accurately remove solid residua from the surface, wiping or mopping away residua, bones, etc.
2. *Circulation usage* : 1 ÷ 2 % in volume at 60÷70 °C, for 15÷20 minutes
Spray usage : 1 ÷ 2 % in volume with water with an adequately powerful spraying device. Let it rest.
3. Drain and rinse with clean water.
4. If necessary, when particularly consistent residua is present, repeat the operation.
5. If a complete sanitization of the surface is necessary, treat the surface with an adequate sanitizer, based on the directions of health authorities.

PRECAUTIONS

Please refer to the material safety data sheet.
