

# HydroFlex Graffiti Guard Porous

**Hydroflex Graffiti Guard Porous** is a protective coating against chemical attack, ink, paint, oil and tar for porous surfaces. Although widely used in the domestic sector to protect buildings and walls from Graffiti attack, it has also many applications within the industrial sector to reduce the labour costs of removing unwanted paint and creates an easy to clean surface. It is especially useful on concrete and brick walls.

**Hydroflex Graffiti Guard Porous** has a high absorbency fluid, offering advanced protection to porous surfaces. This transparent, hydro and oleophobic, easy to clean surface impregnation can be used on almost any porous surface.

**Hydroflex Graffiti Guard Porous** comes in a ready to use and is easy to apply.

Please note that all our Hydroflex Coatings require the appropriate preparation before application.

Coverage: approximately 1 litre = 8m<sup>2</sup>

## ECO.3® System

The HydroFlex range is suitable for use in any industrial or domestic application and is designed to be used as part of the HydroFlex ECO.3 System. The ECO.3 System has three unique stages: Clean; Coat; Care; Initial cleaning is done to provide a soil free surface, then the HydroFlex coatings are applied to the substrate to increase surface performance. Finally, the resulting protective surface is cleaned using HydroFlex Paint Remover if severely attacked. It can be cleaned easily if the surface requires with our Hydrosafe Cleaning solution.

Cleaning times can be reduced by as much as 50% thus overall savings can be made in your maintenance budget.

## Product Order Codes:

HFX-GGP100M	100ml
HFX-GGP1L	1 litre
HFX-GGP5L	5 litres

## General Product Properties

- Easy to Clean
- Protects against Graffiti and Acid Rain
- Chemical Resistant
- Withstands repeated cleaning

*ECO.3® Compatible Product*
