

## NEUTRAL ACETIC

### NEUTRALIZING ACID WITH LOW RESIDUAL

ACETIC NEUTRAL is an acidic liquid formula for the final wash after neutralizing the caustic treatment of cleaning building surfaces.

It is a calibrated mixture of acids and buffering agents, which neutralizes the action of any alkaline or caustic residues that may be left in porosity of clean building surfaces chemically.

Forms soluble salts of easy removal, with a low salnitrazion surface effect.

#### INSTRUCTIONS FOR USE

It is used at a concentration of 1 - 5% or according to the schedule, spraying it on the surface to be neutralized.

If necessary rinse with water.

#### PRECAUTIONS

Before use refer to the material safety data sheet.

Revision: AB 02/13  
Substitute: FR 12/02

The instructions and the information above are dictated by an extensive laboratory experience of practical use and are therefore accurate and relevant. Since the actual conditions of use by users are beyond each ns. practical possibilities of control, it is provided by us without any representation or warranty, express or implied.
