

Nanolia PreClean™

Nanolia PreClean *concentrate* with its revolutionary built-in corrosion inhibitor is a high-performance yet non-hazardous, biodegradable cleaner for metal, painted and plastic surfaces. Supplied as a concentrate for 10:1 dilution with ordinary tap water, it simply and efficiently removes even the most stubborn dirt and stains leaving surfaces scrupulously clean and ready for coating with Nanolia's nanocoatings. It quickly and easily removes rust, mould and fungus, fat and oils and also any remains of old polish on surfaces such as worktops, baths and basins, sports equipment, tiles, signage and even the contamination that can build up on boat hulls by the passage through water.

Originally developed as the essential pre-treatment for use with Nanolia PowerCoat Pro, [Graffiti Guard for Non-porous Surfaces](#), [Powercoat](#) and [Powercoat M](#) Series, it is also an amazingly powerful yet cost-effective household and DIY workshop cleaner!

Properties:

- Ideal for the special preparation of surfaces to be treated with Nanolia products
- A neutral special cleaner for the thorough cleaning of all types of metal and especially coloured metals
- Accelerates the drying process by virtue of a hydrophobic effect
- Perfect for use for in industrial immersion baths and ultra-sonic equipment
- Protects sensitive metals through the built-in corrosion inhibitor
- Highly concentrated and therefore highly productive and economical
- Biologically degradable according to the OECD regulations

Application:

Always test a small sample to ensure that the desired result is achieved before proceeding with the main project. If in doubt, do not proceed.

Mix the cleaner in the proportion 1:10 with water. When used for cleaning metals mix the cleaner in the proportion 1:20. Apply to the surface to be treated generously using a sponge. Leave for 20 minutes to soak in and take effect. Rinse off using plenty of water.

Product Definition / Transport Definition (German regulations):

Xn = Unhealthy

This product is not classified as "dangerous goods" according to the German regulations RID, ADR, ADN, IMDG, IATA-DGR.

Availability:

0,25 kg bottle, 1 kg bottle, 10 kg canister. Other packing forms/sizes are possible after prior consultation with us and according to the transport possibilities/regulations.

**Storage:**

The product may be stored for at least 24 months in its original packing. Protect from frost and direct sunlight.

Disposal (German regulations):

Empty containers as well as any remaining product must be disposed of according to the local laws and regulations or it must be taken to the community collection point for such materials.

Safety/Protection Measures:

When using this product please take note of these instructions. We wish to make it clear that the use of chemical preparations should only take place when the safety measures are observed and are always out of the reach of children. The technical information given here is according to the latest technical knowledge and composed from our own experience. In view of the many uses possible with this product it is therefore the responsibility of the user to act according to the given situation in respect of safety - that is to say the user acts upon their own responsibility in any given situation when using this product. As the use of this product takes place out of our jurisdiction, we have set out safety and protection measures, but we cannot be held responsible in any circumstances. For any misuse of the product we cannot be held responsible. In the event of a new version of this information becoming available – this information set out here is no longer valid.
