

RIMOX PEN

PAINT FOR WRITING OF PENS, INKS AND SOME PAINT

RIMOX PEN is a clear liquid made for the removal of graffiti from building surfaces such as marble, tile, granite, unpainted aluminum. It can be used, after the test sample on the surface portion to be cleaned, even for hard plastics surfaces and for certain types of vinyl.

(Like those found on buses, trams, trains), for chemical toilets, waste collection containers in plastic or fiberglass.

It is effective in removing graffiti markings and markers, fatty and delicate surfaces paints inks that are attached from normal solvents.

For limited contact times it can also be used on **paints and varnishes that are attacked in the case of prolonged contact, opacizzandoli.**

For limited contact times it can also be used on paints and varnishes that are attacked in case of prolonged acute contact.

INSTRUCTIONS FOR USE

By hand: Apply by dabbing the message to be removed with a rag soaked in RIMOX PEN, making sure to moisten the cloth again at intervals, in case of larger sized surfaces. Wipe with a cloth soaked, then rinse.

When necessary, you can use it in conjunction with the abrasive flap ABRADE-A-PAD. Immersion: leave immersed without agitation for a time to be determined depending on the type and thickness to be removed.

We recommend to carry out tests of compatibility between the sample to be treated and the product.

Do not use on surfaces that are not resistant to solvents.

Protect materials near the area to be treated if you are not interested in the operation.

PRECAUTIONS

Before use refer to the material safety data sheet.
