

Surface destination:

Delicate and polished natural stones. Specially formulated to be applied on monumental natural stones.

Properties:

Neutral-pH detergent, formulated on the basis of "AB-57" special formulation of Central Italian Institute of Restoration, additivated of special emulsifiers and biodegradable surfactants that are specific to solubilize organic and non-organic pollution. Its balanced formulation allows the product to not alter the appearance of the material to clean and makes it suitable for the application on monumental natural stones. Under request, the product is also available in a thickened form.

Warnings:

- Product for professional use.
- Carefully protect the surfaces to which the product is not intended.
- Equip operators as required by current safety standards.
- Ventilate closed places when using the product.

Use:

RP 108 is ready to use: apply the product using a brush with synthetic fibers, helping its action with abrasive sponges or pads (of course, if the delicacy of the support allows it). Let RP 108 to act for about 15/30 minutes on the surface and then rinse thoroughly with clean water under pressure. Then wait for the drying of the surface in order to evaluate the effectiveness of the cleaning. Repeat every step of the process, if necessary.

It is possible to add the product to cellulose pulp to perform cleaning works which requires long time of contact.

Establish by preliminary tests the resistance of the substrate at the product as well as the proper dilution to use, in order to avoid possible undesirable effects. It is a good rule to act with multiple applications and short contact times rather than with high concentrations of product.

Technical data:

Appearance: opalescent liquid with pungent odor

Specific gravity: 1,06Kg/l

pH: 8,3 ± 0,5

Packaging: 5/10 litres plastic tanks.

Performance:

Approximately, 4-8 square meters for liters of diluted solution.
