

TERMINATOR

Universal cleaner and degreaser for surfaces in general

Destination:

Metal surfaces in general, glass surfaces, natural stone, tiled surfaces in porcelain stoneware, ceramic and klinker, floors, plastic surfaces, etc.

Properties:

TERMINATOR is a product specifically designed for cleaning from organic dirt, oily stains, inks and residues of paints, oils, soot or smog, rubber residues, adhesives or wax, in addition to various other types of dirt.

The broad spectrum of action of the product is guaranteed by a balanced non-foaming formulation, composed of special non-hazardous sequestrants, emulsifiers and degreasers.

TERMINATOR's cleaning action has been specifically studied for not altering neither the appearance nor the consistency of the supports on which it is applied.

It does not leave halos on surfaces.

Use:

TERMINATOR can be applied by imbibing a soft cloth, sponge or paper with the product. Depending on the need, the product can be applied also with spray bottles. The product must be diluted with clean water before use.

The optimal concentrations of use of the product are between 10% and 20% of product in water. For delicate, painted or varnished surfaces, perform preliminary compatibility tests and, if necessary, further dilute the product in water.

For the cleaning of particularly heavy, stratified or aged dirt, apply the product diluted 50% in water or pure.

Surfaces cleaned with TERMINATOR will only need to be rinsed in case of heavy soiling, otherwise it will be sufficient to remove the dissolved dirt with a dry cloth or paper towel.

Always perform preliminary tests on the surface to be cleaned to avoid possible unwanted effects.

Technical Data:

- Appearance: transparent blue liquid
- Specific weight: 1 Kg / l \pm 0.1
- pH: 13 \pm 0.5
- Packaging: 1 liter plastic bottle

Yield:

Approximately, 10 - 20 square meters. for liter of product.

Warnings:

- Product intended for professional use.
- Protect the surfaces to which the product is not intended.
- Equip the operators as required by current safety regulations.
- Do not smoke or use open flames during use.

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
