ECO 3

DEODORANT SANITIZER FOR
TOILET CLOSED CIRCUIT

ECO 3 is a liquid formulation with a high disintegrating power, deodorizing and sanitizing, destined to the maintenance of toilets closed circuit used on aircraft, trains, transportation and entertainment.

ECO 3 has the following characteristics:
- free from formaldehyde, phenols or derivatives and heavy metals
- based on quaternary ammonium salts of the particular formulation
- effective at lower concentration of normal quaternary
- stable in hard water
- more rinseability
- lower toxicity by ingestion compared to normal quaternary
- greater tolerance of organic substances
- complies with the STP-2304 (Alitalia), AMS 1476, the requirements of Boeing D-6-17487 and Douglas CSD n. 3

ECO 3 appears as an intensely blue colored liquid, miscible with water in all proportions, where it develops a pleasant and fresh scent.
At recommended concentrations, the ECO 3 solution does not corrode and does not stain components parts of the toilet, such as metals, rubber, etc.

BACTERICIDAL POWER
The percentages of bacterial killing over time to the various concentrations are shown in the attached Certification of the University of Milan.

INSTRUCTIONS FOR USE
It is used in the circuits of the toilets on board or in the cabins-toilet, in the proportion of 0.1 - 0.5% of the total capacity of the collection tank.
Maintain this concentration by controlling the intensity of blue color. Normally it will be sufficient a concentration of 0.25 - 0.35%, increasing the concentration in case of use for prolonged times or in areas with high danger of bacterial pollution.

PRECAUTIONS
Before use refer to the material safety data sheet.
