

# Endurablend Coating System

Endurablend is the most durable and long lasting colored coating system for roadway applications in the market today. Endurablend consists of a specially formulated polymer cement blended with natural and engineered fibers, aggregates and pigments. EB can be spray applied to asphalt and concrete surfaces to a thickness of 1/8". EB can be colored, patterned and textured to your needs. Stencils are used to create various patterns and designs. Applications include:

Decorative and Enhanced Crosswalks  
Dedicated Bike, Bus and Multi-use lanes  
Traffic Calming Applications  
Textured Friction Surfacing  
Custom Roadway Logos and Designs  
Micro-Surfacing Asphalt & Concrete  
And More..

# Federal Aid “Safe Routes to School”

# Crosswalk Enhancement

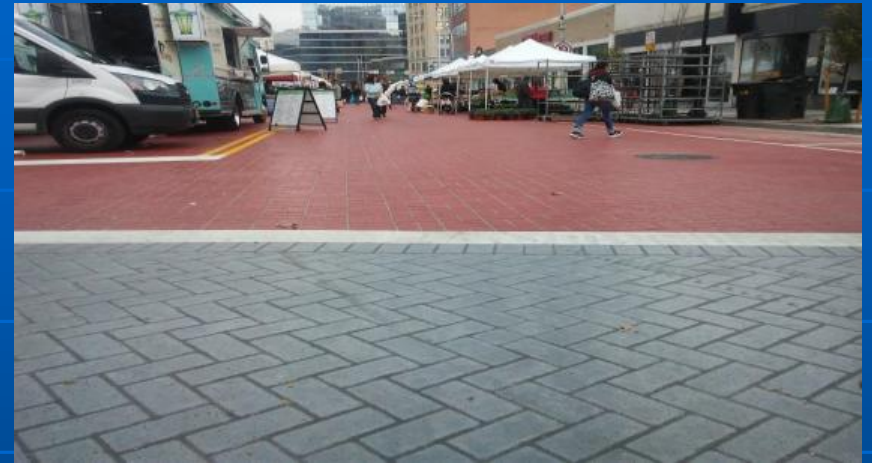

# Streetscape Projects

# Pedestrian Plaza's

# Drop-Off areas

# Decorative Brick

# Bicycle Lanes

# Bike Lane and Multi-Use Path

# Bike Symbol and Bike Coral

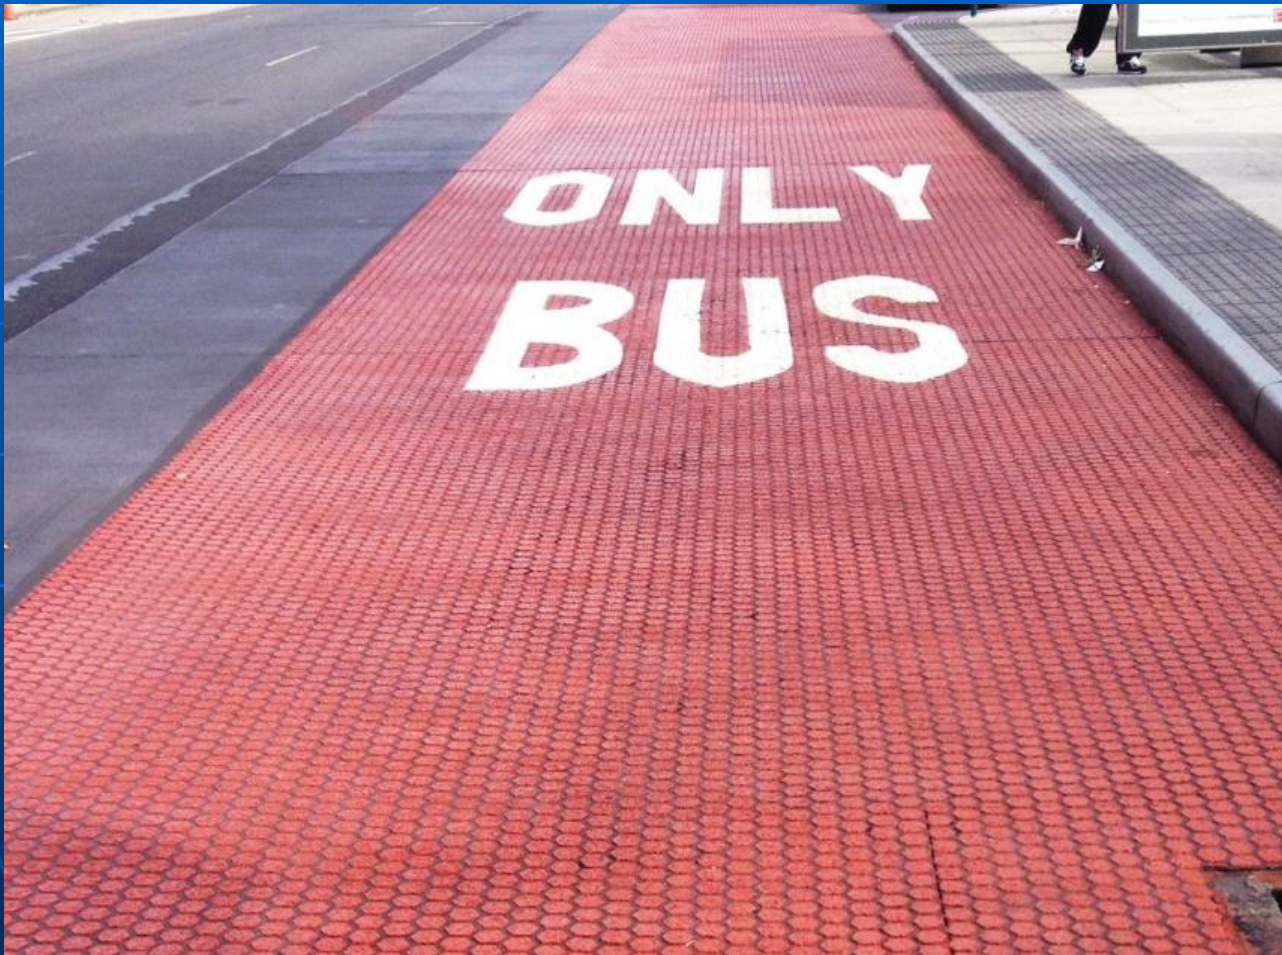

# Bike Lane with Bus Stop

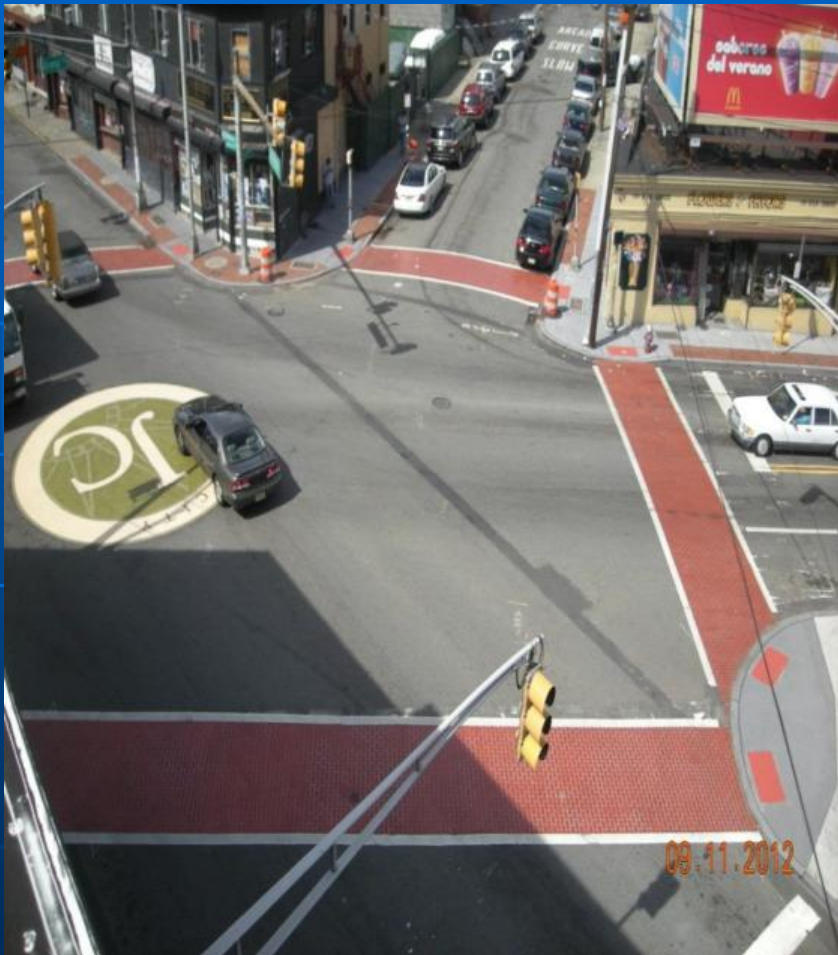

# New York City Bus lane

# Roadway Logos

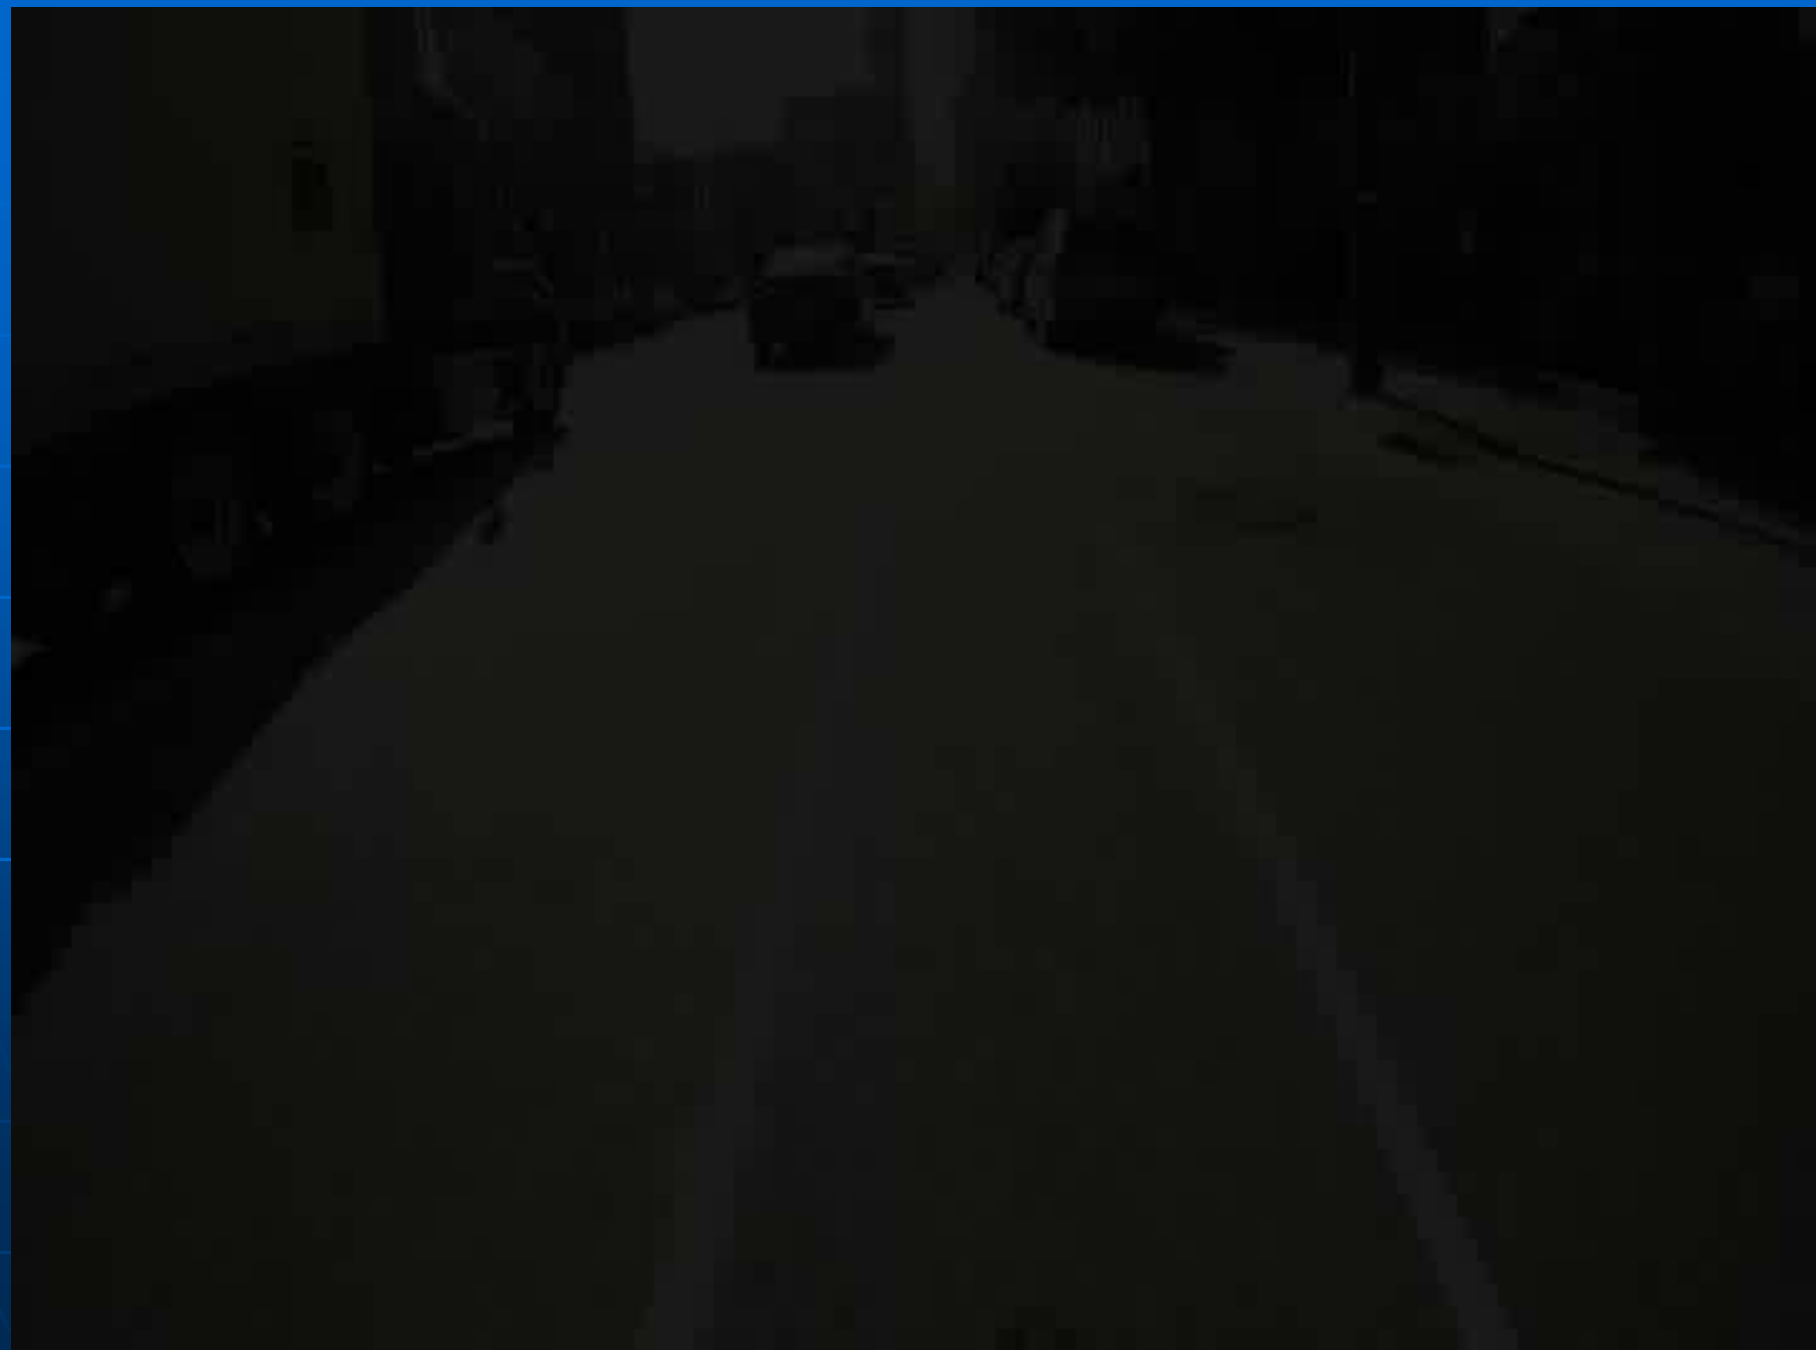

# Newark City Hall

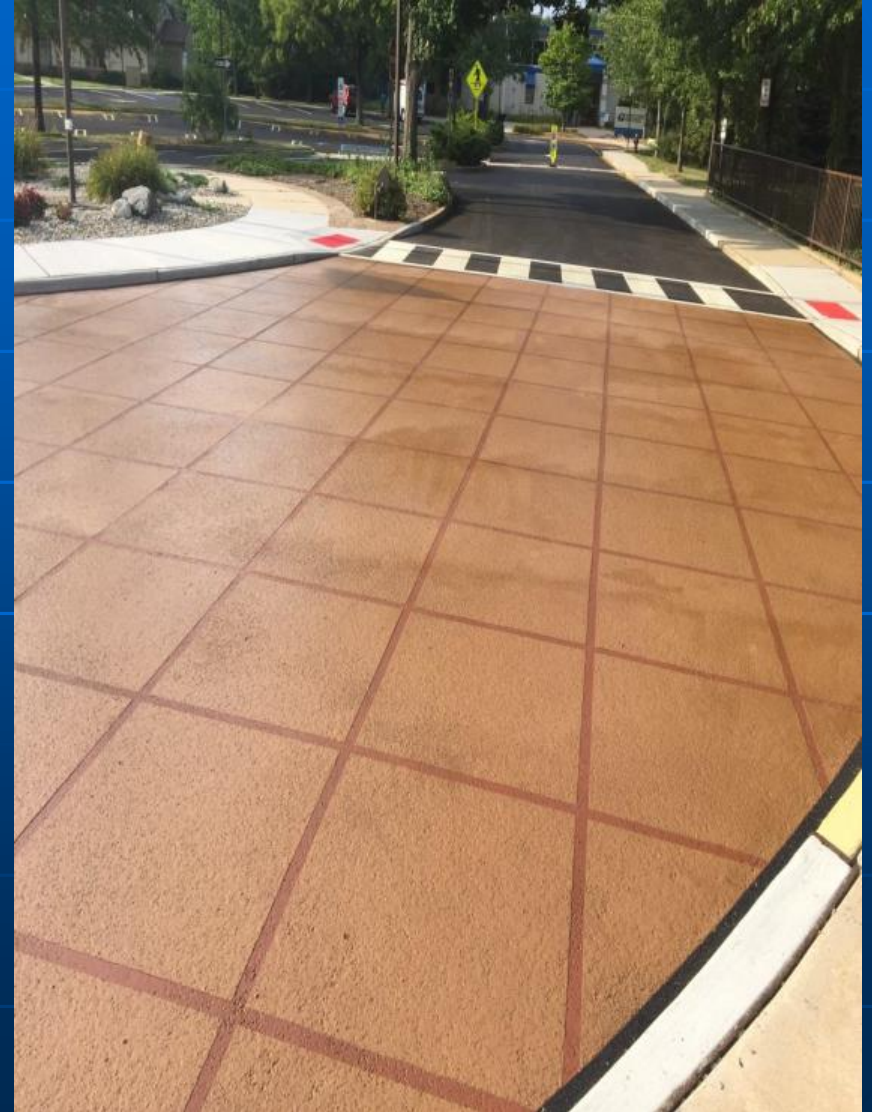

# Cape Town, South Africa

# Custom Patterns, Colors and Textures

# Custom Decorative Designs

# City of Los Angeles Pedestrian Plazas

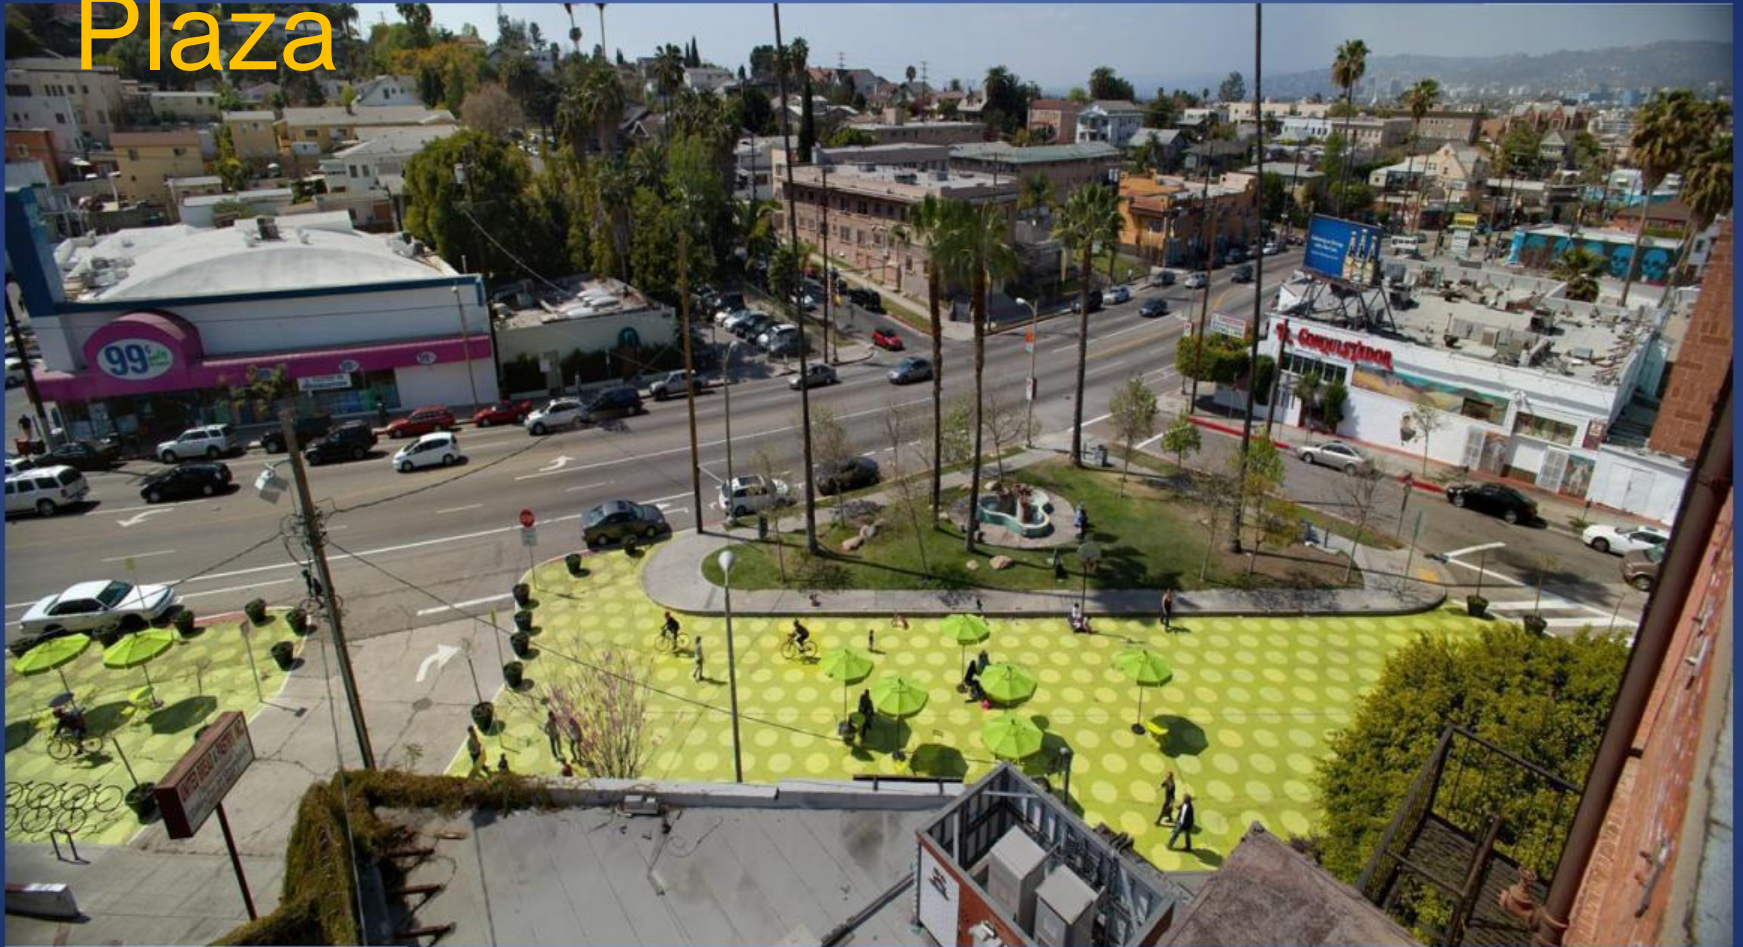

# City of Los Angeles – Sunset Plaza

**Before**

**After**

The use of light colors on asphalt pavement helps increase the **Solar Reflective Index** and lessens the **Heat Island Effect**. Qualifies for LEED credits

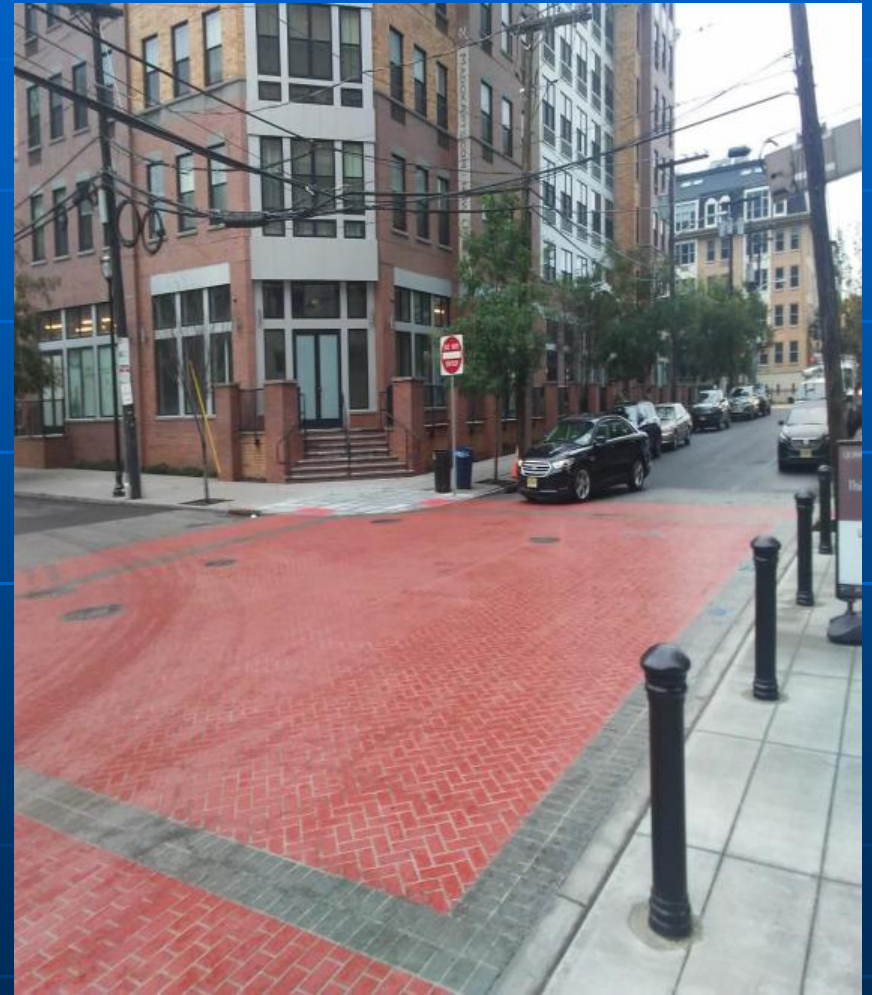

# Traffic Calming “Bump Outs”

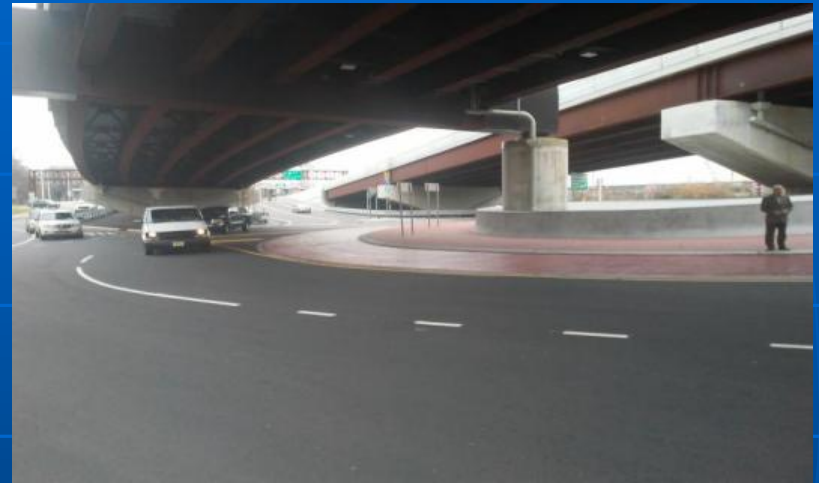

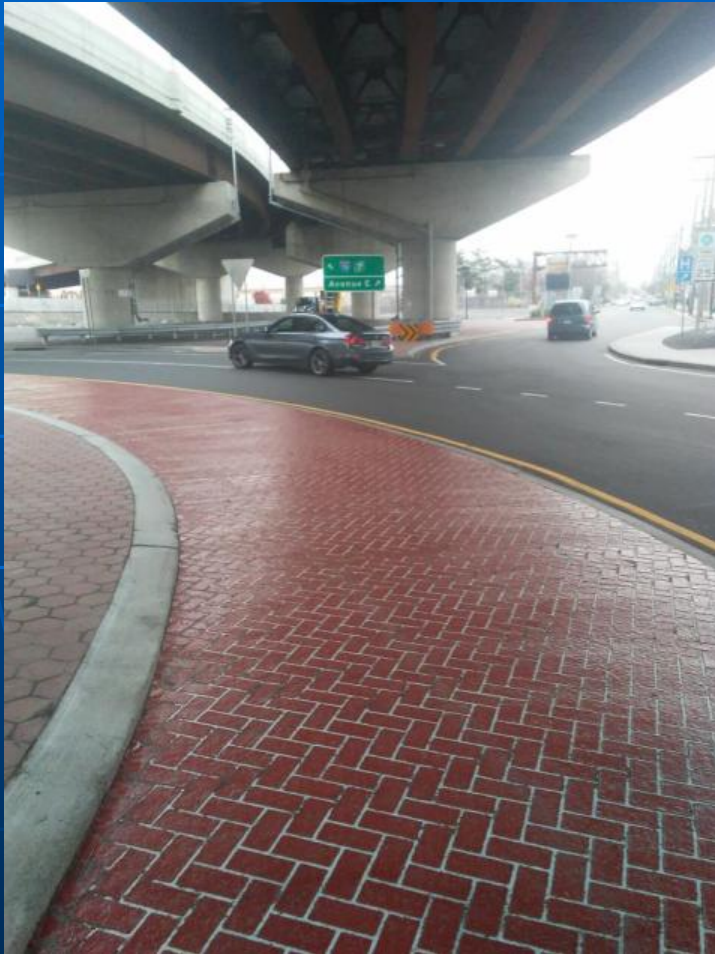

# Raised Intersection

# Roundabout Truck Apron

# Endurablend for School Zones

# Enhanced Crosswalks w/ High Friction on approaches

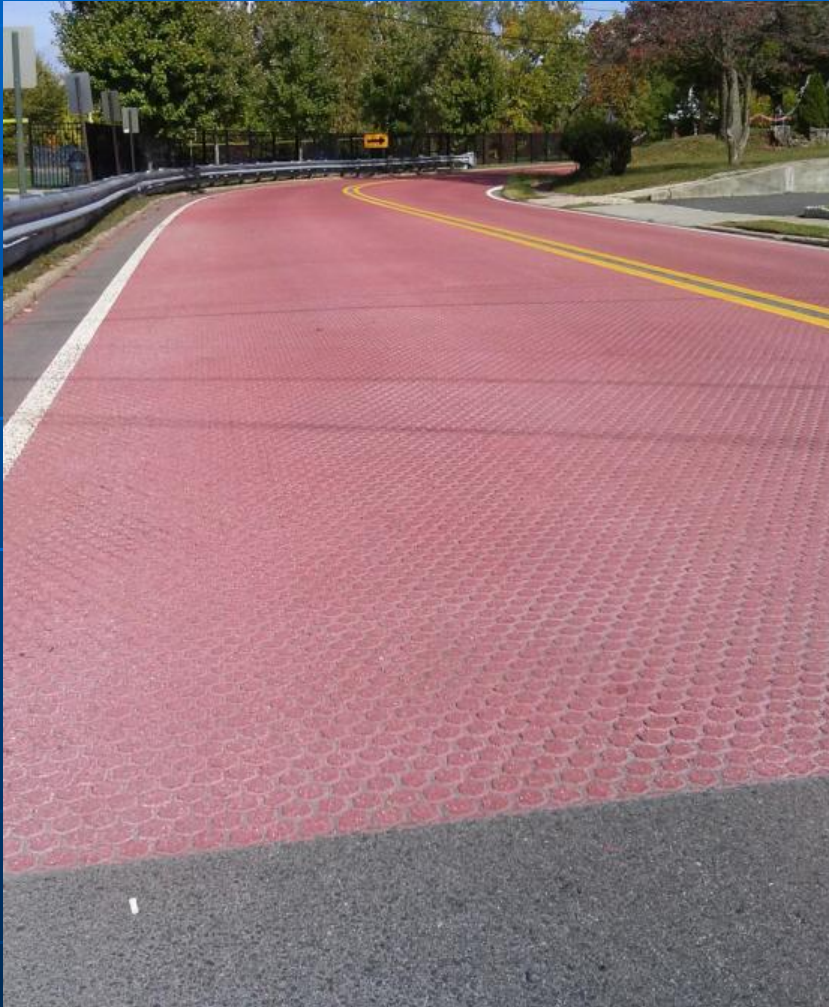

# Traffic Calming “Gateway”

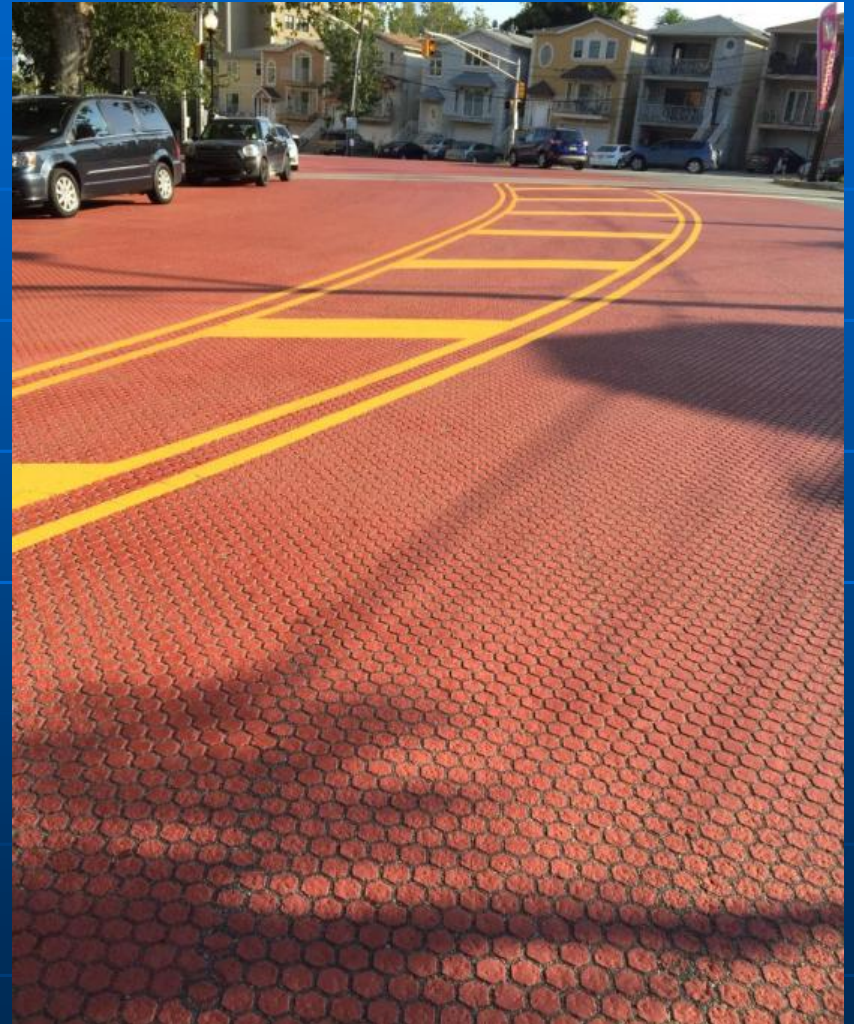

# **Endurablend High Friction Surfacing Treatment (HFST). Hexagon pattern helps reduce rain water on surface.**

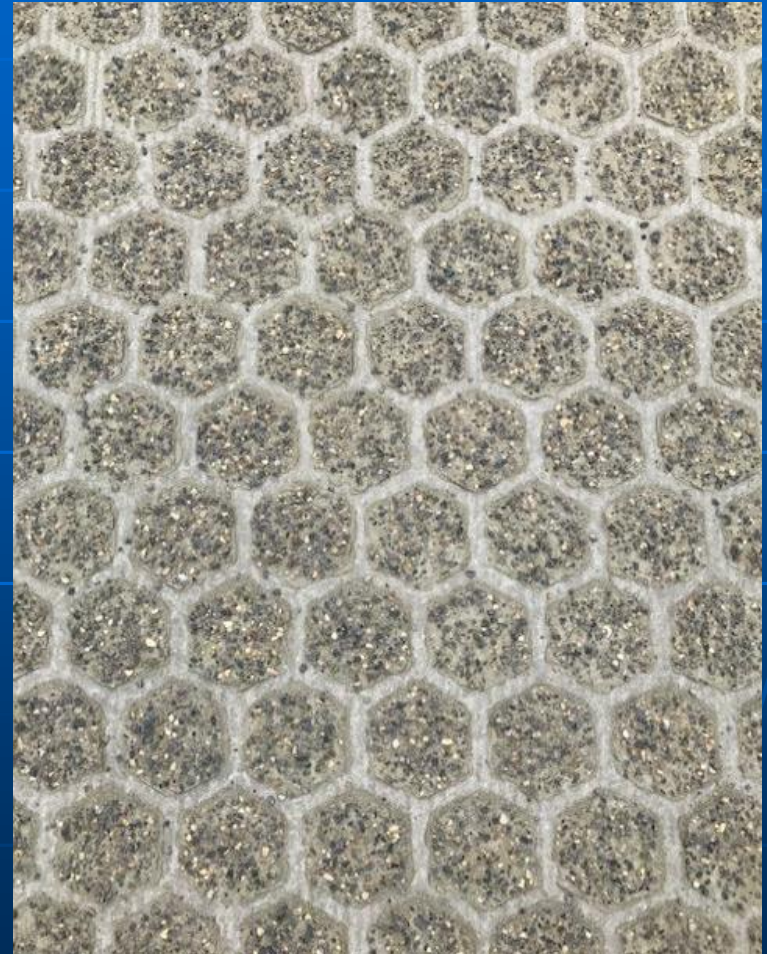

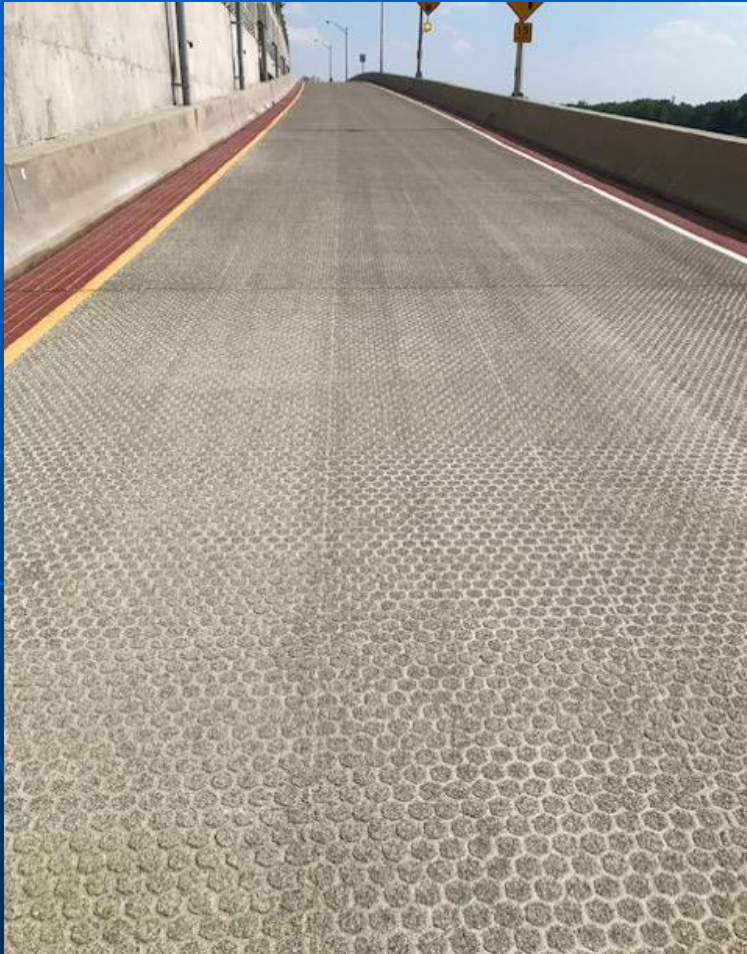

# Create Awareness

# High Speed Ramps

# Endurablend on Old Asphalt

# Three Years Later

# Endurablend for Old Sidewalks

# **Endurablend** over Old StreetPrint

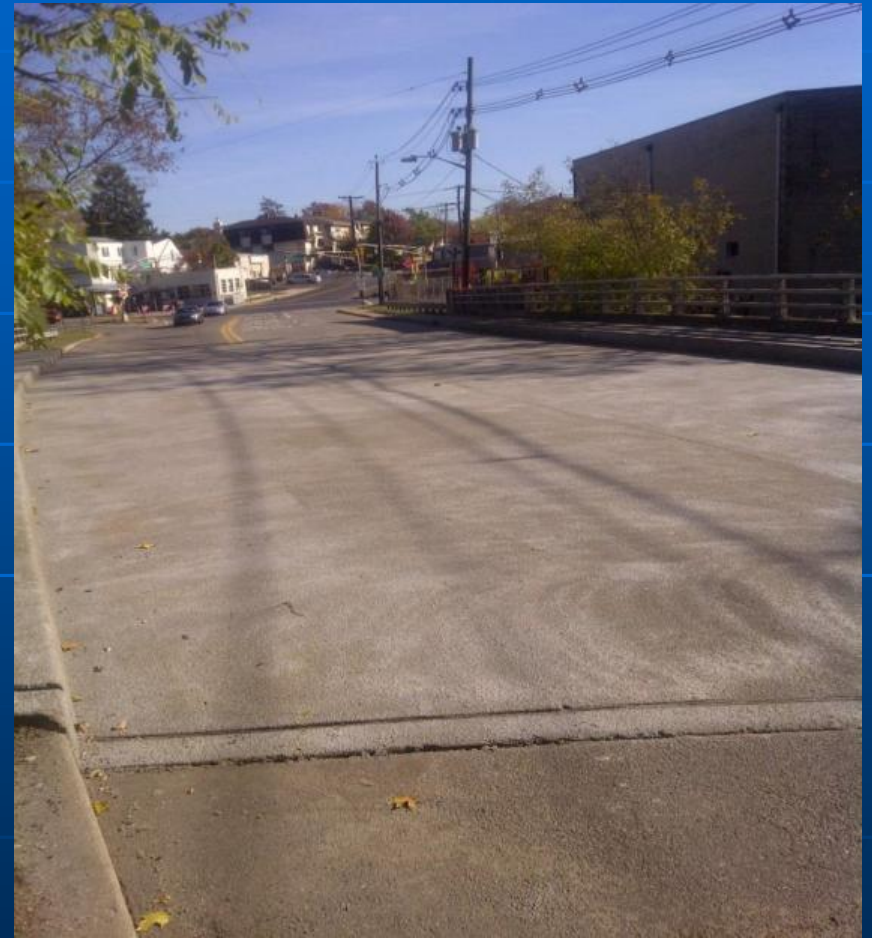

# Micro-Surfacing for Asphalt & Concrete Surfaces

- Seals and Protects surface from oils, salts and de-icing materials
- Preventative Maintenance
- Rehab of older Pavement
- Improves Ride-ability
- Improves Friction
- Extends the life of the Pavement surface.

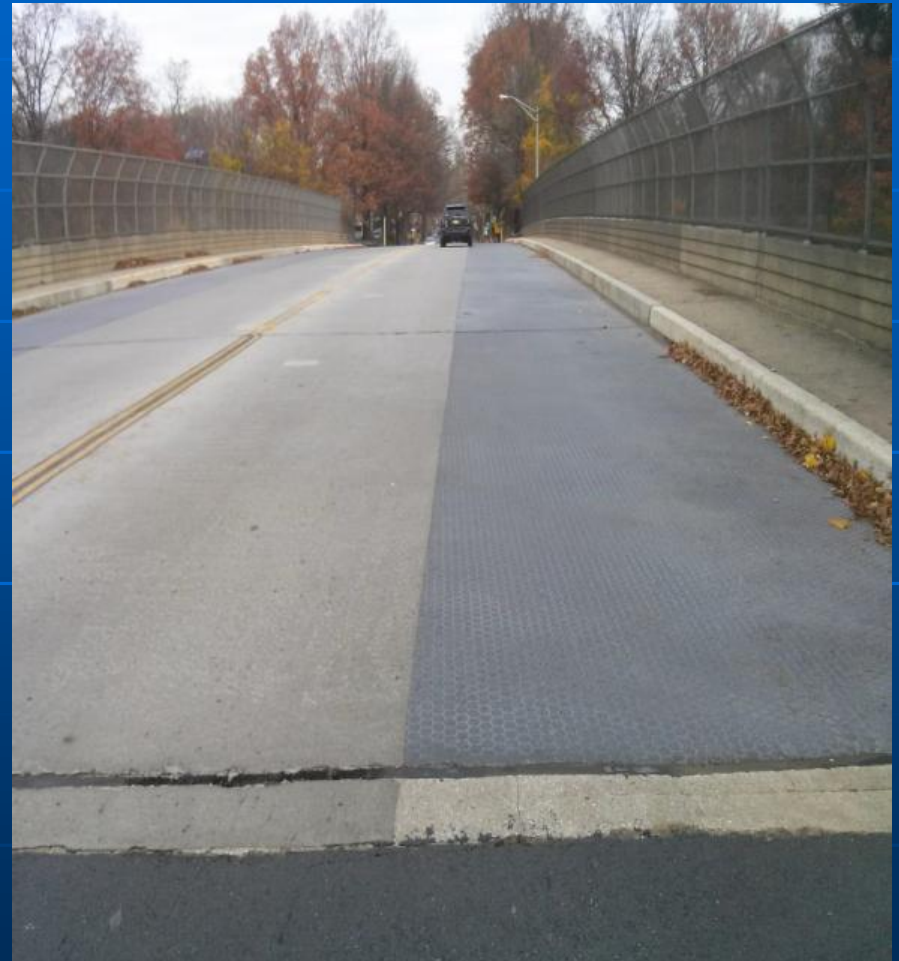

# Rehabilitation of Older Bridge Decks

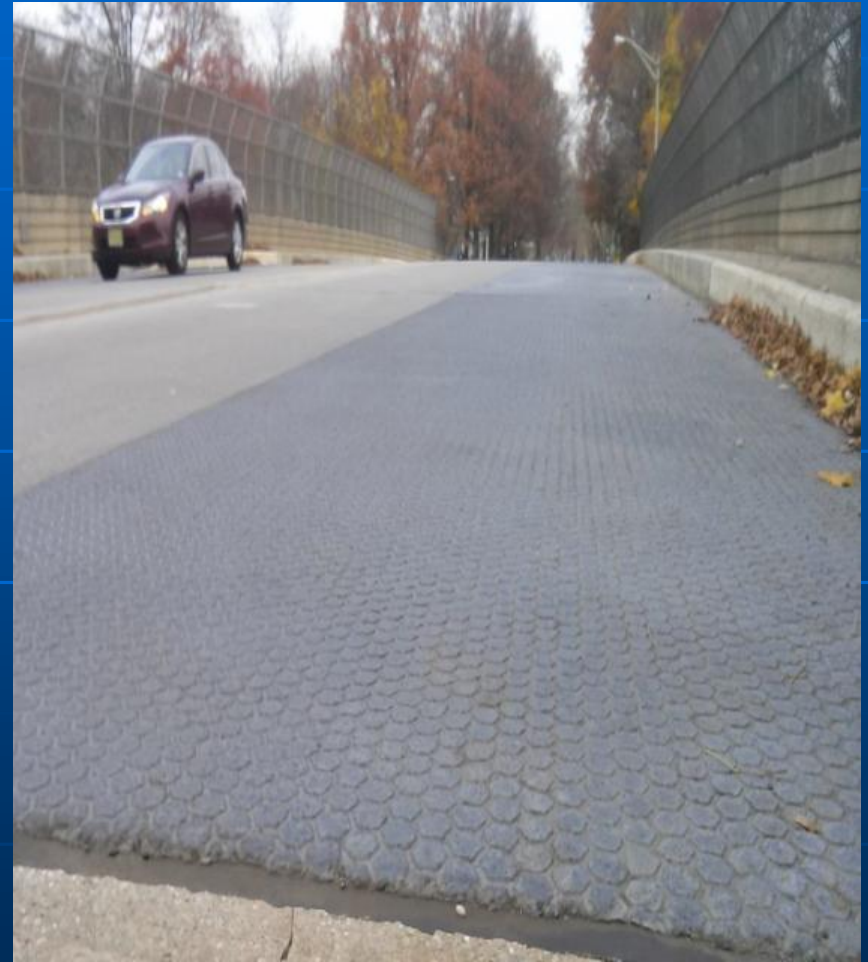

# Rehab of NJDOT Bridge Deck

# **Endurablend** can be Patterned and Textured

# Endurablend for Airports

- Runways
- Taxi Ways
- Holding Areas
- Re-Fueling Stations
- De-Icing Areas
- Rehab Older Pavements
- Airport Pavement Markings
