

Type of product

Sanitizing spray for walls whitening and anti-mold effect.

AntiBacterial Spray is a spray solution, specifically formulated to prevent and combat the formation of bacteria, particularly suitable for the preparation and restoration of wall surfaces that need cleaning and thorough sanitation, effectively heals internal wall surfaces contaminated with mold, algae and lichens.

Fields of application

For surfaces of any nature, new or already painted, interiors of homes, kitchens, hospitals, schools, barracks, dairies, pasta factories, breweries and public and private premises where a strong anti-mold, fast-acting algae action is required and sanitizing.

Technical characteristics

Appearance	Straw liquid
Density	1,05 ± 0,05
Theoretical yield	15 – 20 Sq.m./Lt
Dilution	Apply as it is
Minimum reaction time	10 - 15 minutes (according to surface degradation)
Storage stability	12 months
Standard packs	Lt. 0,750

Store the product at room temperature away from sunlight and in its tightly closed containers. Not apply the product with temperatures lower than + 5 ° C and higher than + 40 ° C with relative humidity higher than 85%

Rules of application

Preparation of wall surfaces

Apply AntiBacterial Spray with a special spray applicator on the areas to be treated, at a distance of 10 - 20 cm, let react for 10 - 15 minutes according to surface degradation, then brush and clean the surface, with damp cloth or sponge.

If necessary in case of extreme surface degradation or presence of (residual) mold, repeat the operations previously indicated.

It is possible to paint the treated surface after 30 minutes from the application on a dry surface.

After use, unscrew and rinse the trigger, then screw the cap back on

It is recommended for: In public and private environments with high intensity and bacterial containment.

It is not recommended for: Constant immersion with water.
