

CENTRI STORICI

Internal and external lime paint

.....
Real limewash, ready to use, natural and non-filtered (with grains), for internal and external walls.

Properties

- True traditional limewash (with small grains), can be applied inside or outside, with a brush in 2 layers. The 1st layer can be done with a roller to save time
- CENTRI STORICI does not pose any health risks. It is made of fat lime, calcium carbonate, titanium dioxide, methylcellulose, guar gum, primers, dispersants, formaldehyde-free bactericidal, additives (<3%)
- It prevents any moisture on façades
- It can be applied on every kind of lime, lime and cement and gypsum substrate, or on porous paint (with a first application of an acrylic paint or vinylic paint on plaster board, and of PRIMER SAN TOMMASO on non-porous paint)
- A wide range of 320 colours guarantees a precise colour (the mixtures can be prepared in advance for homogeneity on sites)
- Highly resistant to temperature changes and hygrometry
- Very good adhesion to substrates

Requested pigments

- Sparkling SOCLI's pigments
- Natural and artificial SOCLI's pigments

Use

Limewash for internal and external walls

Contraindications

- Do not work directly on a non-porous substrate
- Do not apply outside of 10°C to 30°C
- Do not expose to rain or cold the day after application (always protect the substrate)

Consumption

5 to 8 m²/L and by layer (depending on the substrate)

Packaging

4-L and 12-L buckets
