TADELAKT

Thin decorative plaster

TADELAKT is a decoration plaster, 100% natural and ready to use. **TADELAKT** is a perfect alternative to tiles in bathrooms, spas, wet rooms and hammams, as it is in Morocco. Completely natural **TADELAKT** is produced with natural hydraulic lime, natural additives and fine sands to prevent cracks.

Properties

- **TADELAKT** is a traditional decorative Tadelakt (water-resistant and excellent for kitchens, bathrooms and hammams, along with "savonite")
- It can be applied directly to all lime, lime and cement, cement or gypsum board substrates. For other walls, it requires application of PRIMER SAN TOMMASO
- **TADELAKT** is bright and can be easily coloured
- Because of its admixtures, it reduces the risk of cracks
- Fewer layers compared to a traditional tadelakt produced with lime from the Marrakech area
- More crack-resistant than other Tadelakt made from Marrakech lime
- Very breathable
- Naturally mould-resistant
- Time-tested
- Natural and green

Uses

- To make traditional tadelakts

Pigments

- SOCLI's sparkling pigments
- SOCLI's natural and artificial pigments

Contraindications

- Do not use acid detergent to clean and protect the tadelakt. Use black soap only
- Do not apply outside
- Do not create any sgraffito if the tadelakt has to be in contact with water (a bath for example)

Packaging

- 25-kg paper bags (pallets of 60 bags)

Commercial document with indicative data that shall not be binding on SOCLI.
